

## **New Roebuck range is a cut above the average**

Buck & Hickman has strengthened its offering to the maintenance and construction market by introducing a range of diamond cutting discs from its own brand Roebuck.

The leading supplier of tools, maintenance and health and safety products is now offering a range of discs for concrete and masonry applications in addition to a specially developed PRO disc which prevents undercutting and prolongs the life of the disc.

Graham Blackburn, Product Manager at Buck & Hickman, said: “Not only can we provide a range of everyday cuttings discs ex-stock but we have improved our specialist service, so that we can provide discs on request for unique work with materials, such as marble. With the Roebuck mark of quality, I’m confident that our customers will be happy with the wide range of choice we now have available.”

For further technical information on the cutting discs, Buck & Hickman has produced the new ‘Toolbox’ magazine with other promotions and deals on Roebuck products.

The Roebuck brand is exclusive to Buck & Hickman and offers a comprehensive range of over 23,000 tools, maintenance and health and safety products. Roebuck products are designed specifically for professional users working in demanding industrial environments.
